

## MY HOBBY

by Kinga Szymanek, VIIIb

My hobby is baking and cooking. It gives me pleasure. I like spending time in the kitchen. It is my favorite place in the house. My imagination is very vivid and I have many different ideas. In the kitchen I can get carried away by my fantasy. My adventure with cooking has

only started recently, but I actively try to learn something new every day to keep developing. I bake or cook at least once a week trying new recipes. I try not to give up if something

goes wrong and I keep trying. So far, I have already baked a few birthday cakes, many cakes and pastries and desserts. I also often cook dinners for my family. My family supports me a lot and helps

me fulfill my dreams. They always taste my pastries and deserts and tell me their opinion. They like them very much. Most recently I've baked donuts. Although they didn't come out as they should be, they were very tasty. Inside they had salted caramel custard and applesauce. Surprisingly, these two ingredients go together splendidly. I recommend everyone to try this combination. In the future, I would like to be a professional baker. I'd love to have my own confectionery and make people happy. You can see

some of my pastries and cakes in the photographs.
